

COLLINS IORBEE

Data Analyst | Business Analyst | Data Scientist

Abuja, Nigeria | 08173289915 | iorbeeterver@gmail.com | [linkedin.com/in/collins-iorbee-22a125214](https://www.linkedin.com/in/collins-iorbee-22a125214) | colzman-analyst-github-io.vercel.app

PROFESSIONAL SUMMARY

Results-driven Data Analyst and aspiring Data Scientist with hands-on experience in SQL, Python, Power BI, Excel, and ETL pipeline development. Proven ability to transform complex healthcare and retail datasets into actionable business insights — cutting reporting time by 50% and improving data accuracy by 30%. Experienced in predictive modelling, statistical analysis, forecasting, and data storytelling. Adept at collaborating with cross-functional teams to translate data findings into revenue-driving decisions and operational improvements. HIPAA-compliant data handling practices with a strong track record of delivering measurable business outcomes.

CORE COMPETENCIES

Data Analysis & Visualisation: Power BI | Excel (Pivot Tables, VLOOKUP, Dashboards) | Data Storytelling | Statistical Analysis

Programming & Databases: Python (Pandas, NumPy, Scikit-learn) | R | SQL (MySQL, PostgreSQL, SQL Server) | NoSQL | ETL Pipelines

Machine Learning & Statistics: Predictive Modelling | Time Series Analysis | Forecasting | A/B Testing | Hypothesis Testing | Regression Analysis

Cloud & Data Infrastructure: AWS (S3, Redshift) | Microsoft Azure | Google BigQuery | Data Cleaning & Integration

Statistical Software: SPSS | PSPP

Collaboration & Tools: Microsoft Teams | Git / GitHub | Web Scraping | AI-assisted Analytics (GitHub Copilot, ChatGPT for SQL) | Data Governance & Compliance (HIPAA) | Cross-functional Stakeholder Engagement

PROFESSIONAL EXPERIENCE

Data Analyst | **Cress Pharmaceuticals Limited** | *November 2023 – June 2025 | Abuja, Nigeria*

- Designed and automated SQL-based data pipelines that standardised patient and financial data across multiple clinical systems, increasing data accuracy by 30%.
- Built interactive Excel Pivot dashboards that reduced weekly reporting time by 50%, enabling faster, data-driven insights for executive review.
- Produced 3+ recurring data reports weekly to track revenue, treatment progress, and patient engagement, directly supporting strategic planning and business decisions.
- Conducted data quality audits to detect anomalies in patient records, improving healthcare reporting reliability by 25% and ensuring HIPAA-compliant data handling.
- Partnered with finance and operations teams to translate analytical findings into actionable recommendations, driving a measurable shift toward a data-driven performance culture.
- Managed data workflows independently in a remote environment, consistently meeting deadlines while maintaining strict data accuracy and confidentiality standards.

Data Analyst Intern | **Memotta Nigeria Ltd** | *August 2025 – Present | Abuja, Nigeria (Remote)*

- Designed and delivered a structured 2-month online Data Analytics training programme, teaching Microsoft Excel, Power BI, and SQL to a cohort of 50 students across 3 weekly live sessions (Wednesdays, Fridays, and Saturdays) via Microsoft Teams.
- Supplemented the core curriculum with an introductory Virtual Assistance module, equipping students with broader digital workplace skills relevant to modern data roles.
- Contributed to a real-world data project with NELFund, organising and analysing institutional datasets to rank and prioritise schools by resumption date — identifying which institutions and qualifying students would receive fund disbursements first.

- Managed the full virtual meeting lifecycle: planned, set up, and hosted all online classes and internal company meetings on Microsoft Teams; recorded and published sessions to the company's official YouTube channel for documentation and stakeholder accessibility.

EDUCATION

Bachelor of Technology (B.Tech.) – Industrial Mathematics & Statistics | **Federal University of Technology, Minna** | *Expected September 2025*

Relevant Coursework: Probability & Statistical Inference, Regression Analysis, Time Series Analysis, Machine Learning, Numerical Methods, Database Systems

Capstone Project: Developed an end-to-end healthcare demand forecasting solution incorporating data cleaning, feature engineering, model selection (time-series & regression), validation, and visualisation using Python (Pandas, statsmodels), R, SQL, Power BI, and Excel.

PROJECTS & PORTFOLIO

- Healthcare Demand Forecasting Model — end-to-end forecasting pipeline using Python and Power BI; includes feature engineering, time-series modelling, and dashboard visualisation.
- NELFund Institutional Data Analysis — real-world Excel project to prioritise student fund disbursements by organising institutional data based on resumption schedules and eligibility criteria.
